## Needle-punch and synthetic turf surfacing for a Multi-Use Games Area (MUGA) Outdoor play and educational area

bradleys

SURFACING SYSTEMS

Herne Hill is the largest independent pre-school and pre-prep in the UK, well-known within the area of South London for its happy atmosphere and excellent results.

The new playground surfacing, which has been designed and installed by Bradleys Surfacing Systems, features an outdoor play space and MUGA. The synthetic surfacing delivers optimum safety for children.

Domo's Hockey Xtreme was installed for the MUGA whilst Playrite's MatchWinner Velour was installed for the outdoor play and education area. Signgrass was also used for the outdoor play and educational area to house educational games including hopscotch, number snake and alphabet.

With child safety as a priority, Bradleys chose a Trocellen XC50-10 pad to lay under the entire outdoor area. This made the area soft, safe and comfortable underfoot for the children – it is also durable and easy to maintain.

*"From initial conversations and site visits, through to the drawings based on our expectations and discussions and the installation itself, the team provided an exceptional, friendly and personable service."*
