SURFACING SYSTEMS

3G synthetic surface for football Community project

Bradleys Surfacing Systems were approached by Halewood Town Council in Liverpool to install new football surfacing at their Arncliffe Sports and Community Centre facility, which houses a variety of programmes and activities aimed at residents within the community.

The team uplifted an old-style sand-filled surface, which had been sent for recycling and repaired the existing in-situ rubber shock pad. A new Domo 'Slide DS 50M 3G' surface was also installed. The new surface is now used by the local community and Everton Kicks; the award-winning youth engagement arm of Everton in the community.

"From initial costing to handover of our newly laid 3G playing surface, Tom and his team at Bradleys Surfacing Systems have provided a first class professional service. With minimum disruption to users of our premises and total co-operation with Town Council staff and members, Bradleys Surfacing Systems completely renewed our synthetic playing surface and we now have a facility which is second to none in the area. Many thanks to Tom and all his team!"

George MacKenzie, Town Manager

Client
Halewood Town Council

Area
1383m²

Scope
Uplift and recycle of
existing synthetic turf
surface
3G turf installation
