

# Cheswood Grange, Warwickshire

## Domestic Multi-Use Games Area (MUGA) for football, hockey, basketball and cricket

When the Ryan family purchased Cheswood Grange in rural Warwickshire, their large Victorian property already included a macadam court onsite. The family were keen to have a surface installed that would allow them to play football, hockey, basketball and cricket, as well as tennis.

The Ryan's approached Bradleys Surfacing Systems to install the MUGA with TigerTurf's Evo Excel artificial grass, which was chosen due it being a great all-round surface that is able to facilitate a wide range of sports, as well as offer the kind of durability which makes it a great investment for a domestic property.

As a result of installing the surface, the Ryan family and friends have been able to partake in all their favourite sports at home and be active all year round.

*"Our house already had a tarmac tennis court when we purchased it. Not being massive tennis players, we wanted to convert it to a more multi-use surface. We employed Bradleys Surfacing Systems to design a surface that would allow us to play football, hockey, cricket, basketball and tennis too. TigerTurf's Evo Excel was selected and the result is an all-weather surface we can use as a family year round – it's transformed our court and Bradleys were great to work with."*
