SURFACING SYSTEMS

Multi-Use Games Area (MUGA) for football, hockey, tennis and netball

Edenhurst is a highly reputable independent day school in Newcastle-Under-Lyme. The thriving facility caters for pupils aged from three months to eleven years.

The school wanted to upgrade their existing tarmac tennis courts into a multi-use games area for football, hockey, netball and tennis and selected Bradleys Surfacing Systems to complete this large-scale project.

The project, which was fully undertaken by Bradleys involved puncturing the base to promote good drainage, cutting and surfacing root damaged areas with tarmac and installing aluminum edging to the finished surface. The surface chosen was Playrite's MatchPlay 2 on a 10mm Playrite MatchPad, with the quality, flexibility and lower maintenance costs making it an ideal choice of surface for the school.

"From start to finish I felt we were in good hands. The initial quotations gave us options that were sensible and easy-to-understand and we had plenty of advice to help us choose the right one. When it came to installation, it happened on time and with a minimum of fuss, bearing in mind that school was in session. During installation, we were invited to watch and were given explanations as to what was happening. The follow-up has been great and Tom has readily answered our queries. The surface, Matchplay 2, is superb and does exactly what 'it says on the tin' and has been a marvellous addition to our facilities."

Nick Copestick, Headmaster

Client
Edenhurst Preparatory
School

Area
1342m²

Scope
New edging
Puncture base for drainage
Repair damaged base
Shock pad installation
Synthetic turf installation
