Tennis club resurfacing

bradleys

SURFACING SYSTEMS

Bradleys Surfacing Systems were contracted to work in conjunction with Playrite to resurface a double court at Liversedge Tennis Club in West Yorkshire. The current surfacing on the courts was looking old and

haggard, so the team uplifted the existing Matchplay2 surfacing, recycled it and replaced it with a new Playrite Grandplay tufted, sand-dressed surface, designed for club level tennis which require medium/fast-paced play.

Located just minutes from the Playrite Factory, it was an honour to work alongside Playrite and deliver this project.

Client
Liversedge Tennis Club

Area
1020m²

Scope
Uplifting and recycling existing surfacing
Synthetic turf installation

"We've had comments by visiting teams about how well laid the surfacing on the court is. It was put down very quickly and left very little mess. I would recommend Tom and the team for future projects and would be happy to speak to any future clients on his behalf."

Gary Meynall
