

Teddington MUGA

Domestic Multi-Use Games Area (MUGA) for football, hockey, basketball and cricket

Over the past couple of years, Bradleys Surfacing Systems has seen a big increase in the request for synthetic turf MUGA installations at domestic properties. One of these was a family in Teddington who were looking to have a MUGA installed at their property.

The project involved creating a sub-base using Permavoid 85, which was chosen due to limited access to the site and also because of tree protection issues on the property.

Tiger Turf's Evo Pro surface was chosen on a 5mm PVP shock pad, which is surrounded by a 3m high twin bar fence, incorporating goals, a basketball hoop and tennis practice wall.

"We are delighted that we used Bradleys. Right from the first site visit I liked Tom and the fact it was a family business, and I favoured their modern recycled plastic sub-base replacement. They are a highly professional company who completed the area to time and budget, and we hardly noticed they were here! Tom was very flexible with regards to requests which came in from us as they went along. Our three children are delighted with the area and are happily playing football, hockey, tennis and basketball after school and at the weekends."
