

The logo for Bradleys Surfacing Systems, featuring the word 'bradleys' in a lowercase, sans-serif font.The text 'SURFACING SYSTEMS' in a smaller, uppercase, sans-serif font, followed by three horizontal lines.

Looking for sports or play surfacing for your school, nursery or playground...but not sure which one to choose?

Bradleys Surfacing Systems has searched the market for the best products so you don't have to.

At Bradleys we understand that for headteachers and others involved in procurement, sourcing the right surface can be a confusing and lengthy process. With so many products on the market with different applications, it's often difficult to know which surface is right for your particular educational facility.

As part of the service provided by Bradleys, we've searched the market for the best products in terms of quality and assurance and compiled a brief review overleaf to help you make an informed decision.

BASE

PermaPlay

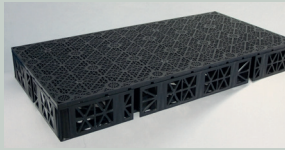

Application

Sub-base replacement for play and sport areas.

Details

Made from recycled plastic, PermaPlay is a modular system that greatly reduces the amount of aggregates required in a base. PermaPlay is especially suited for areas with significant drainage issues, when trees need to be protected or access is an issue. New to the UK in 2014, we predict this product will do well.

Manufacturer InfraGreen, UK

SHOCK PAD

PVP Sports Mat

Application

Shock absorbing layer for sport areas and playgrounds.

Details

The PVP Sports Mat is available in 5mm or 10mm thicknesses depending on the application required. If tennis and netball are to be played on the surface then 5mm will be more appropriate than a 10mm pad, which is better suited for hockey and football. The products made by PVP consistently deliver exceptionally high standards.

Manufacturer PVP Gummi, Germany

PlaySafe

Application

Shock absorbing layer for play areas

Details

Playground safety surfacing product, tested to EN 1177 standards. With systems suitable for all ages and in a number of critical fall heights, this is an effective product to have installed under play equipment. Playsafe systems are completed with Matchwinner velour (please see below).

Manufacturer Playrite, UK

SYNTHETIC SURFACES

Edén

Application

Landscape / play areas

Details

A unique, omni-directional™ synthetic turf product, creatively made to perfectly replicate natural grass. Edén's deflection of light and incorporation of moss and hazel colours in the thatch layer make this product extremely realistic. New for 2015, this product will show you just how much landscape turfs have improved – it's soft, dense and looks great.

Manufacturer TigerTurf, UK

Matchwinner Velour

Application

Play areas

Details

A low maintenance, vandal resistant, sand dressed needle punch top surface available in a range of 14 bright colours. Using laser cutting technology, it can be custom designed to create fun and educational shapes and patterns. Playsafe by Playrite offers an excellent alternative to natural grass, bark-covered areas, wet pour and asphalt and provides a surface that is soft underfoot, as well as being durable in any weather.

Manufacturer Playrite, UK

SYNTHETIC SURFACES

Evo-Pro

Application

Sports / multi-use games areas

Details

A fantastic all-rounder, Evo-Pro is great for high usage and is a high performing multi-use surface. It can be used for football, netball, tennis, hockey and general play. Available in a range of colours, this product can really brighten up an area as well as delivering a great sports surface.

Manufacturer TigerTurf, UK

MatchPlay 2

Application

Sports / multi-use games areas

Details

Durable and hard-wearing this is an excellent choice to help you make the most out of any sports facility. Matchplay 2 is unlike any other sports surface you've seen with the surface able to host a number of different sports, from football and hockey to netball and basketball. An excellent needlepunch multi-sports surface with low sand content and low maintenance.
