

Lenches Tennis Club, Evesham

Refurbishment of tennis courts and MUGA

bradleys

SURFACING SYSTEMS

Lenches Tennis Club in Evesham received a significant amount of funding from the local community and the rest through Sport England and Worcestershire County Council to refurbish two tennis courts and one Multi-Use Games Area.

Bradleys was selected by the club to carry out the refurbishment on the tarmac courts, which being 15 years old, were in a worn and tired state. TigerTurf Advantage Pro was chosen for the surfacing for both the tennis courts and MUGA due to its high performance

and durability characteristics. The MUGA includes line markings for football, netball and tennis; providing further opportunities for sports club usage, such as local Cornerstone United who will use the MUGA for 5-a-side football.

Client
Lenches Tennis Club

Area
1745m²

Scope
Synthetic turf installation

"When we were looking to raise funding for the club, the LTA weren't in a position to provide us with the money required, so we had to explore other avenues. We have a predominately elderly demographic at the club who find the tarmac hard on their knees and hips, so the principle driver for refurbing the courts was to find a safer and softer surface for them to play tennis on. It's fantastic that the local community rallied together to support Lenches to help raise the money to make these changes to the club which they can enjoy now and in the future".

Patrick Twist, Chairman and Committee member
