

Wakefield Indoor Football Centre, Yorkshire

3G synthetic surface

Wakefield Indoor Football Centre offers a spacious venue for 5-a-side football – both league and leisure based to take place. The centre has four different pitches, which were all in need of new surfacing due to high usage.

Bradleys was selected to install the new surfacing and chose Playrite's Conqueror 60MF – a tufted 3G surface with a sand and rubber infill, which allows a high-level of play to take place. Bradleys worked with the centre to ensure the

work was carried out in the smallest time frame possible in order to have minimal impact on the centre's busy schedule. The new surfaces have been well received by customers and will be an excellent investment for the business.

"I have been very impressed with the attitude and works completed by the Bradleys team. The team worked to a strict deadline and got on with the job. They offered plenty of advice and called to do a revisit after the works were completed. I would gladly recommend anyone to use your services."

Darren Hoyland, Director
